Student Satisfaction Survey

Introduction

Our College has administered student satisfaction surveys in order to elicit student opinion and perspective regarding institutional TLE, climate, programs, and services. As part of a broader assessment effort, student satisfaction surveys provide a means to understand student opinion at a given point in time. The *Student Satisfaction Survey* is intended to assess the satisfaction of Interstate border area College students concerning campus TLE climate, services, and facilities, and to ensure educational accountability and institutional transparency.

The results of the 2019 survey represent the most recent student assessment and are a component of the college's comprehensive evaluation of campus programs and services integral to the institutional and learning environment. The resulting data provide important reference materials that add to curriculum and administrative program review.

The survey Started on April 11, 2019 and closed on May 10, 2019. In total, 250 students were invited to participate in the survey and 75 students responded for a response rate of approximately 30%. All surveys were validated and used for reporting purposes.

Key findings are presented in this summary to provide the college community insight into student perspectives at a given time. Additional reports and presentations will be shared with faculty, staff, administrators, and students through workshops, and during committee meetings. Additional information is available upon request from the Office of IQAC.

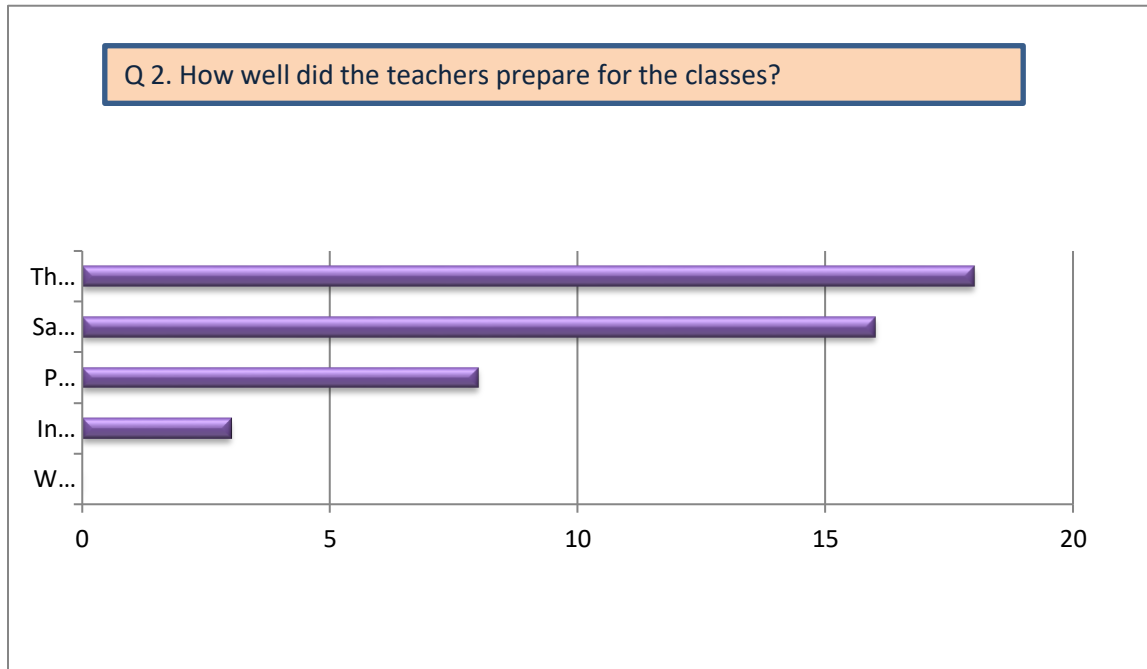

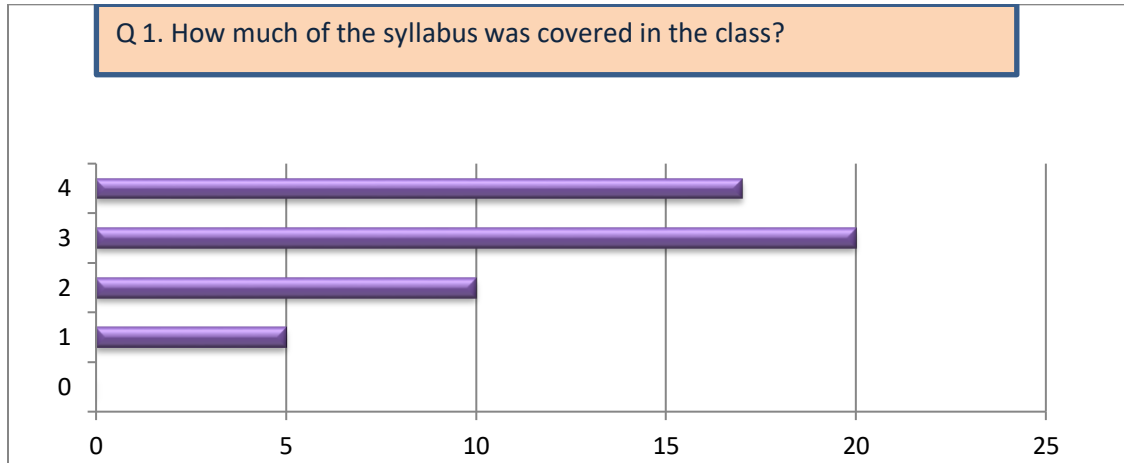

Methodology

The survey was developed by the Office of IQAC with input from members of the college's student, who were asked to respond to the questions and make suggestions regarding question wording and type, length of survey, and survey administration.

To assess student perception of various aspects of the college, participants responded to 21 questions ranging from satisfaction with instruction and services to the extent to which their experiences at the college met their expectations. The results of this survey will be used as a diagnostic tool to make improvements to college programs and services. The survey was organized into seven themes: climate, services, facilities, policies and procedures, classes and programs, faculty and instruction, and advising and counselling.

STUDENT SATISFACTION SURVEY -2018-19

TOTAL NO. OF QUESTIONS: 21

Q 3. How well were the teachers able to communicate?

Q 4 . The teacher's approach to teaching can best be described as
